K+D

K+D WebCenter

(Data management)

Facts

- > ongoing reduction of «time to market»
- > layout development takes too long
- > complex organization with inefficient decision making processes
- > invalidated pre-press processes

Solutions

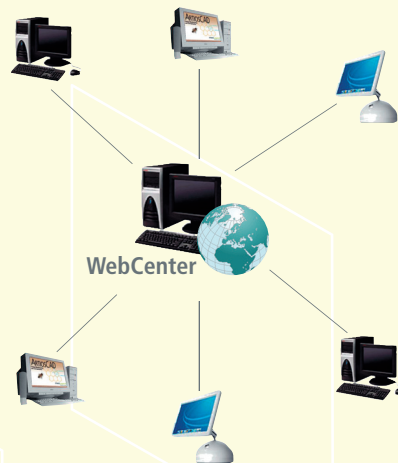

- > K+D Webcenter offers customer-specific, parameterizable, virtual project management for all partners on both the part of the customer and at K+D
- > individual assignment of authorization levels (e.g. view only, modify, release data)
- > audit trail of validated pre-press processes
- > K+D Webcenter seminars for faster product familiarization and value added deployment

Benefits

- > networked, clear-cut, virtual project management between customer and K+D
- > time (24h) and location-independent availability of data
- > GMP compliant, validated pre-press processes between customer and K+D
- > standardization and automation of print job data and processes
- > data integrity thanks to multiple backup versions and multiple firewall protection
- > faster «time to market»

Pricing

- > low license cost per user
- > order-related project solutions or custom package geared to customer needs
