

K+D Pharma Datacenter

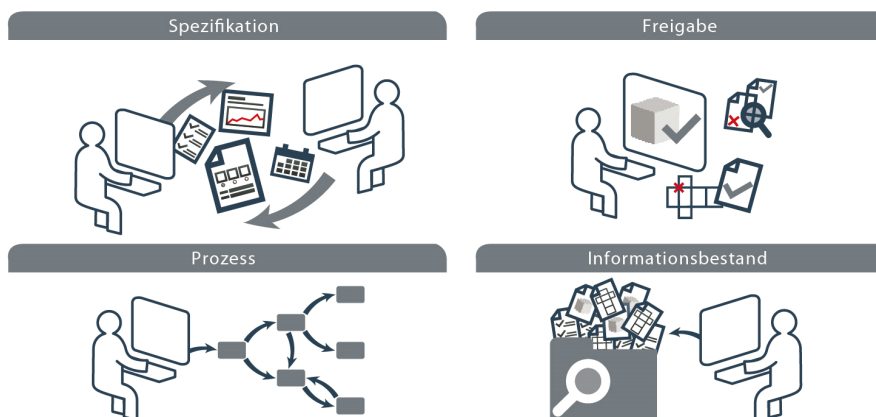

For us, tomorrow's world is today's world

Functional data management with future potential can work miracles everywhere. But particularly in the demanding packaging industry. Complex order processing is simplified, processes are precisely defined, data security improves and the decisive «time-to-market» is reduced.

How it works

The K+D Pharma Datacenter is a powerful web-based platform that takes care of the organisation of all data projects, approval cycles and digital information.

These are our solutions

- The K+D Pharma Datacenter range of services accelerates layout developments and substantially shortens the decision-making processes.
- Virtual project organisation is parameterised for the customer. It includes all customer and K+D contact persons.
- Interfaces between the contact persons can thus be directly and efficiently managed.

Your benefits

- Individual password-protected assignment of authorisation levels
- Traceable, validated pre-press processes
- Location-independent 24x7 data availability
- GMP compliant pre-press processes
- Safety and security due to daily full backups and multiple firewall
- You can choose between three service level packages «Bronze», «Silver» and «Gold».

	Bronze	Silver	Gold
Data transfer	X	X	X
Use of FTP server	X	X	X
GfP cycle with K+D		X	X
GfP cycle internally and with third-party suppliers			X
Test operation		X	X
Creation of workflow		X	X
Hotline 2h/month		X	X
Training		½ Tag	1 Tag
