

## K+D Pharma Quality

# Our new quality check sees everything

The networking of the AccuCheck modules of three Bobst Expertfold folder-gluer guarantees an uncompromising 100% check. With this world premiere K+D creates a unique selling proposition in pharmaceutical quality.

### How it works

- The print data provided by you are stored and fed into the Accu-Check database
- During the last step of the process, the gluing, each printed and die-cut folded box is meticulously compared with the data you supplied.
- Errors such as smudging, or white spots that are larger than 0.5 mm are identified
- Faulty boxes are ejected
- Result: We reproduce your data down to the smallest detail, your folding boxes are guaranteed without deviation or impurities

### Your benefits

- No mix-ups (code check)
- No faulty prints
- No impurities on the cardboard
- Inspection of all perforations and cutting lines
- No torn packages (breaks or tears)
- Marginal output loss in the gluing process
- Significant reduction in or merely identification check of your incoming goods inspection
- Fewer returns, less administration, reduced process costs

Depending on the inspection process you can save up to 20 minutes per item during your quality inspection.
